

PowerMadd Sentinel Handguard mounting on KTM 1090/1190/1290 Adventure

34452 ATV/MX Mount

NOTE: Use these instructions along with the instructions provided with the mount kit.

Clutch side:

Loosen the clutch perch assembly and slide to the left up against control cluster. Mount bracket underneath the lever right next to clutch perch as shown in photo. Adjust height and width of the handguard to your preference using the instructions included in the 34452 mount kit. Tighten all fasteners. Use 34253 handwrap instructions to install handwrap.

Throttle side:

Loosen front brake perch and slide to the left (towards center of motorcycle) just enough to make room for the mounting bracket. Mount bracket over the brake lever, between brake perch and throttle assembly as shown in the photo. Adjust height and width of the handguard to your preference using the instructions included in the 34452 mount kit. Tighten all fasteners. Use 34253 handwrap instructions to install handwrap.

Sentinel Street LED light kit Instructions KTM 1090/1190/1290 Adventure 34491

NOTE: Use these instructions along with the instructions provided with the Sentinel Street LED light kit.

NOTE: KTM has two accessory leads. ACC1 = constant power. ACC2 power when key is on.

Remove the headlight to expose wires. See owners manual for disassembly instructions.

Connect all four of the supplied spade terminals to the four wires on the LED module.

1.) Find the ACC 1 accessory wires. Connect the wire labeled “-“ to the brown wire and the wire label “+” to the other wire.

2.) Find the right turn signal wires. Remove a 1.5” section of the wire cover. Connect a supplied T-tap to the hot wire (blk/white). The white wire labeled “right” will connect here.

3.) Find the left turn signal wires. Remove a 1.5” section of the wire cover. Connect a supplied T-tap to the hot wire (purple). The yellow wire labeled “left” will connect here.

Using the instructions provided with the 34491 kit, complete the installation of the Sentinel Street LED light kit.
