

PowerMadd Sentinel Handguard

Late model Hayes brake

34454

Arctic Cat 2012-2018, Polaris Axys, 2014 – Current, Yamaha Viper and Sidewinder 2013-2018

NOTE: On these model, check clearance if you have a mid to tall windshield. PowerMadd offer mid and tall shields for the Arctic Cat and Yamaha that will work with handguards

Use these instructions along with the instructions provided in with the mount kit 34454.

Brake side:

The Hayes brake side bracket is designed to replace the top cap on your Hayes brake perch. To install remove the top perch cap and replace with the Hayes mounting bracket. Use the provided 60mm torx pan head screw and one original screw. Use the torx T30 wrench to tighten. At this time only snug the screws. Place the bracket next to the right mounting tab on the handguard as shown in

PHOTO 1

Adjust handguard to your personal preference. Final torque spec is 7 foot pounds

Throttle side:

Mount the throttle side bracket just to the left of the throttle block. Place bracket next to the left mounting tab on the handguard as shown in
